Wall Mounted Lamp

## BIRON LIGHT FIXTURES

*By Luminescence: the art of lighting*

SPECIFICATIONS

LIGHT CHARACTERISTICS

This lamp is composed of two cast rings, one at the top and another at the bottom. It features platinum forgings and includes a vent and a crown at the top, positioned above a repoussé dome made of aluminum. The upper ring is bordered by a leaf-shaped motif, while leaves are placed at the ends of the lower ring. The opening mechanism utilizes hinges crafted by BELT.

RELEVANT INFORMATION

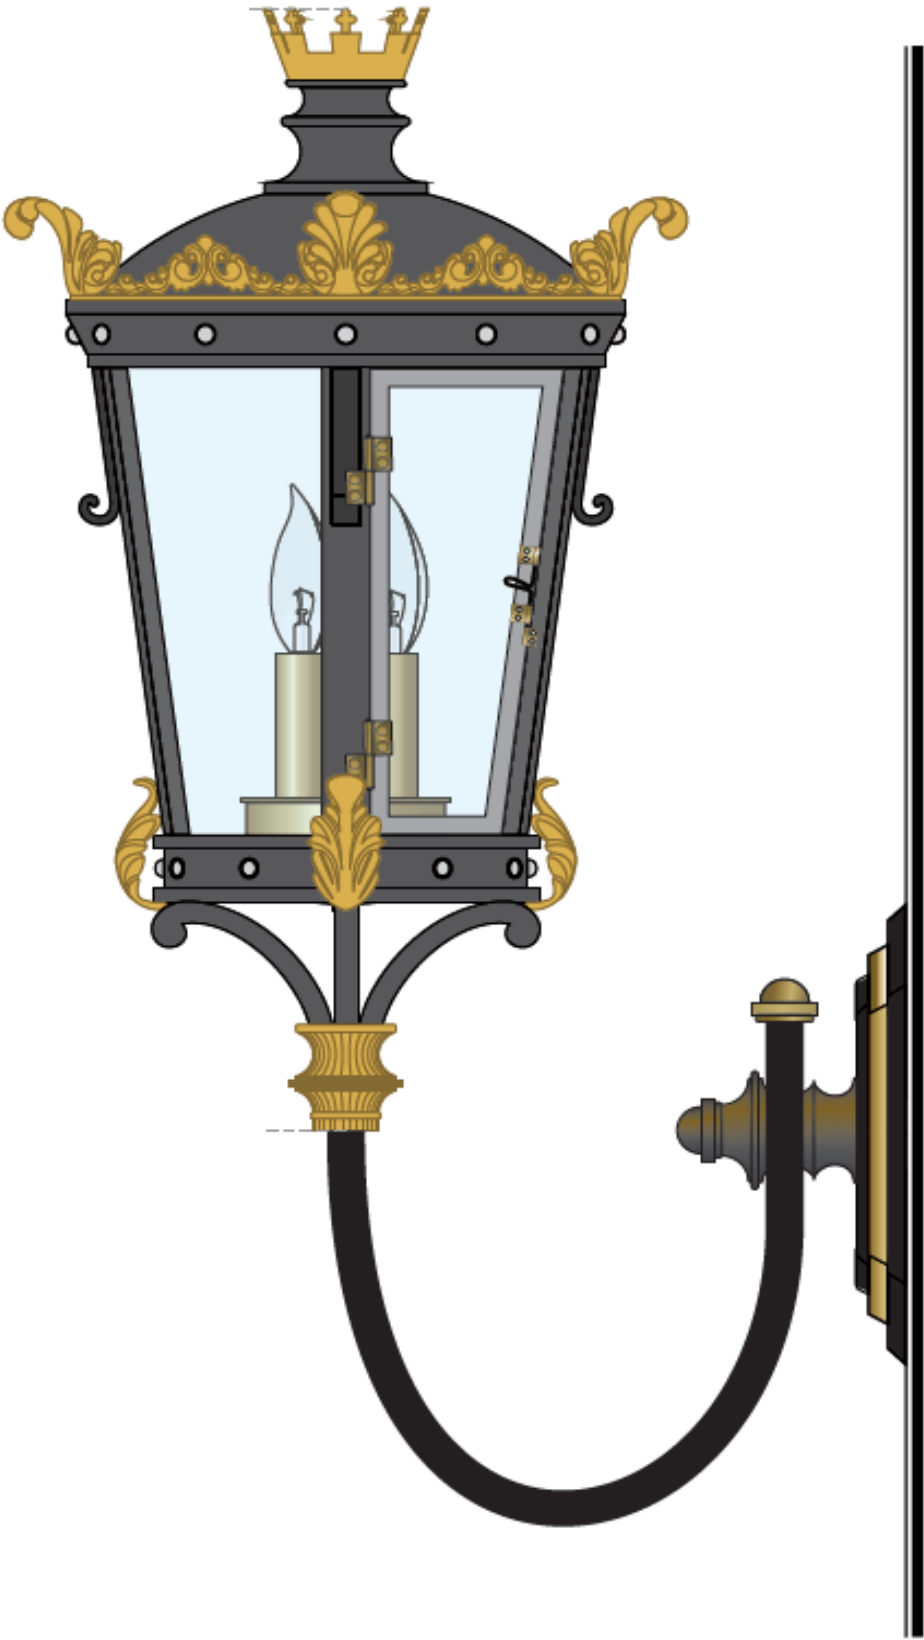

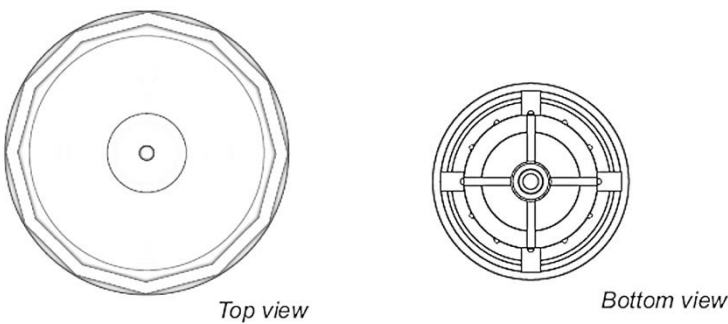

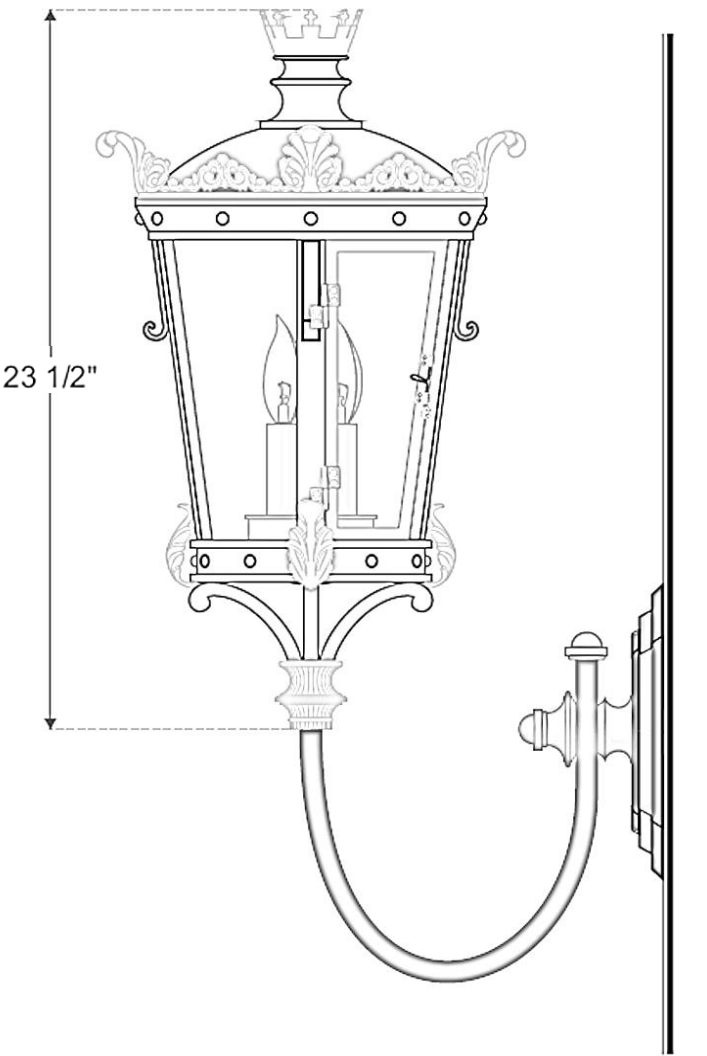

4mm glass.  
Interior and exterior uses.  
Made using all UL-listed parts.

PRODUCT DIMENSIONS

32”h  
42”h

OPERATING CHARACTERISTICS

Closed terminal electrical system with a 50” cover.  
Stripped vehicular cable (Ground pole).  
E12-25W bulbs.  
Gas system option, price upon request.

BIRON

Wall-mounted light

- All Hand Made Signature Piece
- All UL listed Parts
- Anchoring System
- 4 Lights Electric Systems T1A4-6
- Gas System option, price upon request

*The Biron Light Fixture is a masterpiece of art inspired by the sculptor August Rodin’s Palace in Paris; this romantic collection brings to life the exquisite taste of the modernist style of the late 19th century.*

We transform stainless steel into artworks, designing inspiring and sophisticated pieces using millenary techniques and timeless craftsmanship. As true experts in metals, we embrace our alchemy and transform dreams and ideas into unique metal artwork.

*We interpret and translate the dream of our clients working with passion in every project. Our know-how is priceless; everything we do is manufactured by experts in ancient technique almost lost in our days. The special finishes we use like oil, bee wax & patina enhance the beauty of everything we do.*

## BOULEVARD LIGHT FIXTURES

*By Luminescence: the art of lighting*

Our light fixtures are hand-made by metal craftsmen who, with many years of experience in the company, have grown to become experts in the luxury transformation of metal using European millenary techniques. Manual processes such as forging, embossing, casting, and polishing were used to achieve the artwork. The materials were mostly aluminum, followed by iron.
